

# tkinter Widget Options Reference

Drop-down combobox list of widgets:

Button  
Checkbutton  
Colors  
Combobox  
Entry  
Frame  
Label  
LabelFrame  
Layout Managers  
Listbox  
Message  
Notebook  
OptionMenu  
PanedWindow  
Progressbar  
Radiobutton  
Separator  
Scale  
Scrollbar  
Spinbox  
Text  
Toplevel  
Treeview

By selecting a widget you'll see this:

Selecting "colors" opens a graphic for reference.

Selecting "Layout Managers" opens a pdf for reference.

Concerning specific widget help:

### **Reference** button

With a widget selected clicking the **Reference** button opens your default web browser to the [www.nmt.edu github tkinter doc](http://www.nmt.edu/github/tkinter/doc) page for the selected widget. This is one the most comprehensive tkinter reference sites.

### **Bottom Panel**

In the bottom panel find the ttkthemes class name for the selected widget and the **Search** button.

The **Search** button starts an Internet search for the "tkinter widget-name". If you highlight one of the displayed options it will search specifically for that widget option.

*Esc* and *Ctrl-q* keys will exit the app.

*Ctrl-k* brings up a standard color chooser.
